

Bee Yard Application Spray Pattern For The Honeybee Ultra Field Spray™

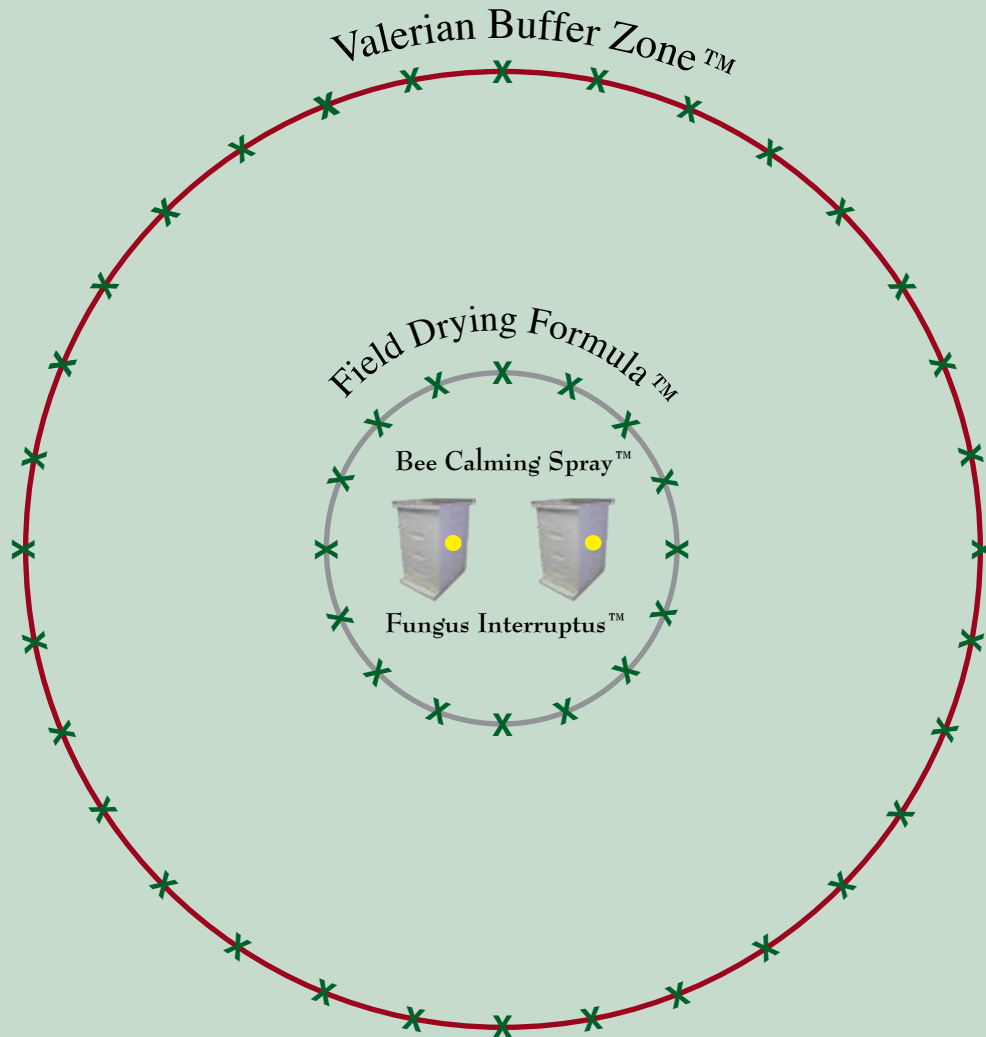

Apply One Full Big Blaster Spray Every 15' Toward The Ground Following This Pattern

Bee Yard Application Spray Pattern For Fungus Interruptus™, Field Drying Formula™, Valerian Buffer Zone™ And The Bee Calming Hive Spray™

Apply the small bottle Field Sprays by walking around the Circumference of Circles approximately 10' and 50' from your Hives, as best you can. Apply the Sprays toward the ground with one spritz every 10' or so. Apply the Ultra Field Spray™ First, then Fungus Interruptus™, the Field Drying Formula™ and last, Valerian Buffer Zone™. Apply the Valerian Spray and the Bee Calming Hive Spray™ on the Outside of your Hives. For simple CCD protection, apply the Ultra Spray once every 3 months and the three other sprays once a month. Or, for more

advanced beekeepers and in difficult weather conditions, apply the Ultra Spray™ once every 3 months and Fungus Interruptus™ Every 2 to 4 weeks, Field Drying Formula™ once a month, (no more than every 3 to 7 days in wet weather), Valerian Buffer Zone™ once every 1 to 3 months. Use the Bee Calming Hive Spray™ anytime you work around your hives and once a week during the summer, once every 2-3 weeks in winter. Please read *The CCD Solution™ Handbook* for more information. This illustration is not drawn to scale.

Apply One Full Spray Every 10' Toward The Ground Following This Pattern
Apply Fungus Interruptus™ With 2 Squirts Directly On The Outside Of Each Hive
